CRONOS SERIES

FARE GATES

TITAN™ Cronos series Fare Gates are the ideal solution for train stations and access control facilities requiring barrier-free access and safety for special-needs customers.

Designed with wide aisle gates, they promote independent access and passage for wheelchair-bound customers, the elderly, children and travellers with luggage.

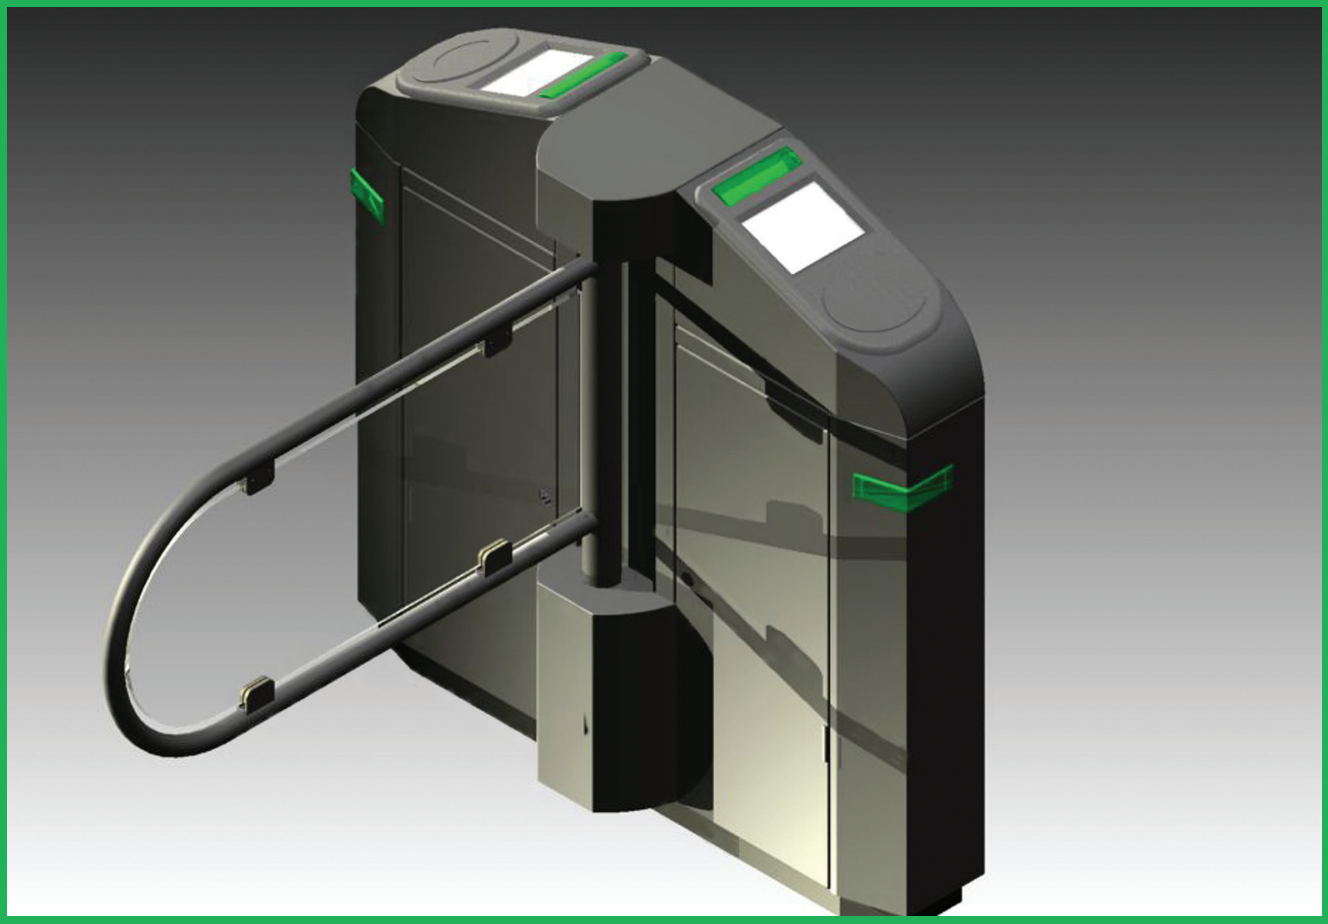
SUPERIOR DESIGN FOR ACCESSIBILITY AND SAFETY

UNIQUELY SAFE

- Modern and uniquely contoured top cover design and intuitive lane guides with angled cabinets provide enhanced visibility
- Highly reliable servomotors of the gate system allows for speed control, manually-assisted usage and accurate swing movement

COST EFFECTIVE

- Modular nature makes it a cost-effective, quick-to-implement solution
- Minimal maintenance downtime and low manpower requirements translate to cost savings in the long term



USER COMPATIBILITY AND CUSTOMISABILITY

- Open source Operating System (QNX) allows for easy integration with existing applications and future system upgrades
- Configurable for various ticketing needs and can interface with many building security systems

Compatible with:

- Contactless smart cards
- Magnetic cards
- Coin tokens
- Biometric access

Complementary interface with:

- Closed-circuit television (CCTV)
- Emergency system
- Building automation system

HIGH DURABILITY

- High-grade stainless steel gate cabinets do not corrode or blemish easily

SUITABLE FOR

Transport companies
Theme park operators
Facilities requiring access control, with or without fare collection
