

Additional safety features on the NSEWL refurbished escalator

Features		Description
Traffic light indicators		Provide commuters clear visual sign on the direction of travel.
Skirt deflectors		Minimise the risk of commuters' feet being caught between the steps and the side of the escalator.
Missing step sensors		Activate emergency stop in the event a step is not installed after removal during maintenance.
Floorplate switches		Activate emergency stop in the event the floor plate is not properly closed and levelled during maintenance.
Handrail speed monitoring		Activate emergency stop in the event of a slipped or halted handrail.
